ABOUT US

The Biocheck.UGent surveys and algorithm were developed by the unit for Veterinary Epidemiology of Ghent University, led by Prof. Jeroen Dewulf.

Biocheck.UGent is a scientific risk-based and independent scoring system to evaluate the quality of your on-farm biosecurity.

With over 81,000 users in 130 countries, Biocheck.UGent owns the world's biggest database on biosecurity in animal production.

**WORLDWIDE STANDARD
FOR QUANTIFICATION
OF BIOSECURITY**

Keeping healthy animals healthy

WHAT IS BIOCHECK.UGENT?

A unique risk-based scoring tool to measure the level of biosecurity on livestock farms.

Our online surveys are available

- for different animal species
- in multiple languages
- free of charge

WHAT WE OFFER

- **Save time with an advanced user account**

tailored biosecurity reports - benchmarking - progress tracking

- **Training and consultancy**

e-learning modules - online lectures - onsite training - expert biosecurity audits

- **Make data-driven decisions**

by gaining insights into your data and de-risking the farms from future outbreaks
